DETAILED ACTION

1. Claim 14 is an improper dependent claim because the claim is dependent from itself.

Appropriate correction is required.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U. S. C. 121:

I. Claims 1-59, drawn to a pharmaceutical composition in the form of liquid or powder consisting essentially of an erythropoietin glycoprotein product, a multiple charged inorganic anion and a pharmaceutical buffer, wherein the product is a human erythropoietin, a modification in the sequence of human erythropoietin, or a pegylated erythropoietin, classified in class 514, subclasses 8 and 42.

Applicant is required to select one sequence modification of human erythropoietin for the glycosylation site in claim 14, 17, 35 or 38. Each erythropoietin protein containing any change of amino acid residue at any one or more positions in the sequence, absent factual data to the contrary, is a distinct peptide. This is not species election.

2. The inventions are distinct, each from the other because of the following reasons:

The claims are directed to a pharmaceutical composition containing an erythropoietin glycoprotein product, wherein the product is a human erythropoietin, a modified sequence of human erythropoietin, or a pegylated erythropoietin. Each modified erythropoietin glycoprotein is patentably distinct from each other because each sequence contains different glycosylation site(s) and produces different effect in the biological activity of erythropoietin.

Because these inventions are distinct for the reasons given above, and because Inventions require different searches but are not co-extensive, examination of these distinct inventions

would pose a serious burden on the examiner and therefore restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
